

Research Participants Needed

Looking for volunteers to assist with a new research study conducted by Dr. Nancy Segal

We want to learn more about:

- the unique experiences of twins, triplets, and more (and any non-twin siblings) born to parents from different racial/ethnic backgrounds, and
- the special challenges faced by the parents who raise them

If you are a multiple (or a non-twin sibling) born to a mixed-background couple OR a parent with mixed-background children, and want more information about the study or would like to join in, contact Dr. Nancy Segal at:

nsegal@fullerton.edu
